Chris Bunkers | Front End Developer

Collaborative developer and recent DevBootcamp grad working to create tools to solve real-world problems. Passionate about technology, health, music and creative communities. Believer in the power of technology as a force for good in the world. Looking for a nurturing workplace environment to continue learning and to put my skills to use building elegant, useful solutions to human problems.

P R O J E C T S

EarShot
Team Lead
earshot-app.herokuapp.com
https://github.com/kromitj/ear-shot

A location-based music streaming web and mobile app allowing artists to target content by geographical parameters. Artists are able to release a song within a limited radius that then becomes available to mobile users within that area. The web platform was created using Ruby on Rails while the mobile end was created with Ionic. EarShot makes use of the Google Maps API, Amazon S3 and Cloudfront for storage and streaming as well as Geocoder for location services.

E X P E R I E N C E
